Vestibular Fresh Extraction Socket Therapy

Dr. Elaskary • Alexandria, Egypt

August 29-30 or November 27-28, 2020

Vestibular Fresh Extraction Socket Therapy

Dr. Elaskary • Alexandria, Egypt • August 29-30 or November 27-28, 2020

A unique course describes a novel clinical protocol to treat a wide variety of fresh extraction sites (thin, or deficient labial plate of bone, severely compromised, actively infected) with immediate implant placement. The protocol is designed to repair socket osseous environment and place an immediate implant at the same surgical setting thus providing immediacy and predictable outcomes. The VST protocol offers shortened treatment time, reduces the number of surgical interventions to only one, preserves the original socket orifice topography during the steps of the treatment until completion, and allows the complete socket rehabilitation with immediate implant placement and bone regeneration.

Dr. Elaskary is the founder of the Elaskary & Associates clinic and educational institute located in Alexandria, Egypt. He is currently a visiting lecturer at New York University, and is the author of three text books in the field of Dental Implantology and Oral Reconstruction; *Reconstructive Aesthetic Implant Surgery*, *Fundamentals of Aesthetic Implant Dentistry* and *Advances in Esthetic Implant Dentistry* all published by John Wiley and are translated in to several languages. Dr. Elaskary has published numerous articles in journals as well as an active member of the editorial review board of the *International Journal of Oral Implantology*.
