

Zoom Webinar

Vestibular Extraction Socket Therapy “VST”

presented by

Dr. Abdelsalam Elaskary

October 17, 2020, 6:00 pm (CET)

WEBINAR DESCRIPTION

This webinar will highlight the scope of the VST technique, and the indications with an emphasis on treating compromised fresh extraction sites and treating infected extraction sites with immediate implant therapy.

LEARNING OBJECTIVES

- Predictability
- Reduced treatment time and number of surgical interventions
- Immediate implant placement protocol for compromised and infected sockets
- Preservation of socket architecture and dimensions
- Ongoing studies showing stable tissue margin with minimal recession

Dr. Abdelsalam Elaskary

Dr. Elaskary currently maintains a private practice limited to periodontics, dental implants and oral reconstruction in Alexandria, Egypt. Dr. Elaskary is a visiting lecturer at the University of New York and has contributed content to two textbooks in the field of Dental Implantology: “*Reconstructive Aesthetic Implant Surgery*”, and “*Fundamentals of Esthetic Implant Dentistry*.” Dr. Elaskary is an editorial advisory board member for the *Smile* dental journal and a society editor for the *Implant Dentistry Journal*.
